Describe Cause of Problem and Remedial Action Taken.\*

Pump failure caused motor valve to remain open. All produced water remained in lined bermed area. All water was able to be recovered.

Describe Area Affected and Cleanup Action Taken.\*

An approximate size of 35' x 15' was impacted. The impacted area is located within the berm. Water line was shut in. Then a vacuum truck was called. The truck was able to recover all the lost water. **Depth to Ground Water: <50' (approx. 18', per New Mexico Office of the State Engineer); Wellhead Protection Area: No; Distance to Surface Water Body: >1000'; SITE RANKING IS 20. Based on site ground water quality and enclosed analytical results.**

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
