13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

JAM Oil respectfully request your approval for off lease storage and commingling. Attached is a map Green=shows existing flowlines and tank batteries on the lease. Red= shows proposed flowlines. Blue =shows existing line that will be used to transport all oil and H2O from the Mohawk, Dekalb & Leonard leases to the Mary Ann Cannon Facility. This well makes appoximately 2.42 BOPD-.14 BWPD. Well test will be conducted monthly by producing each well for a 24 hr. period into a portable tank calculating the volume by color cut and shake out. Doing this and multiplying by the number of days produced each month. All oil produced from same zone and equal gravity so we see no effect on reduced royalties. One of the main reasons for this proposal is to help minimize the problems associated with this low gravity crude (heavy bottoms, high corrosion on the lifting equipment down hole and storage facilities). I am sure everyone involved is aware of the sporadic history over the past years, this proposal will help eliminate the long wait to fill a tank to marketable levels. Royalty Rates: Mary ann Cannon .75%, Dekalb .764, Leonard .74, Mohawk .76.
