13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

CHANGE DEDICATED ACREAGE TO AN 80 ACRE LAY DOWN (SEE ATTACHED SURVEY PLAT).
Change from 40 acre Delaware well to an 80 acre Bone Spring well.

CHANGE OF LOCATION:
Due to well location being unorthodox or at a non-standard location for this pool, the company also requests approval for a move of the surface location to 2060 FSL & 775 FWL (old location was 1980 FSL & 990 FWL), which will be within the 150 ft. radius of the center of the 40 acres.

The pad size will be 300 x 300 ft. with a 321 x 30 ft. access road. The pad will be oriented to a V-Door West with the SW corner being cut off somewhat due to a drainage area. See attached Exhibit A, B, & C for pad size, production, reclamation and diversion of drainages around well pad.

On-site of re-location was performed on 8/26/10 by Tanner Nygren (BLM), Danny Boone (Boone Archaeological Services), Barry Hunt (RKI) and Basin Survey.
