Hole in stock tank. The tank was taken out of service and repaired.

Describe Area Affected and Cleanup Action Taken.\*

Talon/LPE was contracted for the correction of the release. Soil samples were collected from the affected area located behind the tank battery. The work plan submitted to NMOCD was approved; the affected area was treated using Micro Blaze. Soil samples were collected for confirmation. A final report was submitted to NMOCD, the final report was approved by Mr. Mike Bratcher. Finney Oil Company request closure for the release that occurred on 2/6/2010 at the Malco #1 tank battery. 2RP-398

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
