If a Watercourse was Impacted, Describe Fully.* N/A		
Describe Cause of Problem and Remedial Action Taken.* The release appears to be from the well head/stuffing box or possibly a flow line failure. The fluid exited the location on the south side and entered the pasture running southwest between two sand dunes before pooling approximately 400' from the location. The affected area is approximately 4' x 400'. The natural contour of the land contained the release into a narrow area. The affected area will be delineated and a work plan submitted to NM OCD and BLM for review and approval.		
Describe Area Affected and Cleanup Action Taken.*		
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
