Federal Honolulu Lease
Well No. 1-26 is located 660 ft. from N line and 1980 ft. from W line of sec. 26
N 1/4 W 1/4 Sec. 26 13E 27N N.M.P.M.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Wilcat Chaves New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is * _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

* The elevation has not been received yet. I will forward it when received.

I plan to drill a 3200' Glorietta lime test, using rotary to about 800', and cable tools from there to total depth.

I intend to set 13 3/8" conductor pipe at 50' with 25 sacks.

I plan to run 10 3/4" either on top of, or thru the Queen sand, 20' to 900' for water shut off.

A 5 1/2" production string will be cemented in either the San Andres or Glorietta dolomite, as needed.

All pipe will be run and cemented using methods approved by the U. S. Geological Survey.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
