Re: Potential Test
New Mexico State "L" #1
Chaves County, New Mexico

Dear Mr. Gressett:

Pursuant to our telephone conversation, I have enclosed Form C-124 for the above mentioned well. A 4-Point Test was not necessary because of the low volume pressure on the gas, so we ran an 8 hour 1-Point test. The gas volume was calculated to be 341.0 MCF/D, through a 20/64 choke.

We plan to set a compressor later on and get this well on the line. Is there another form we should fill out for this operation?

Thank you.

Sincerely,

Billy Gover
