Contract H. 2015 No. 1

Hobbs, New Mexico December 6, 19 51

Well No. 1 is located 1980 ft. from N line and 1960 ft. from W line of sec. 21

SW/4 Section 21 (1/4 Sec. and Sec. No.)
163 (Twp.)
27E (Range)
N.M.P.M. (Meridian)
El Paso (Field)
El Paso (County of Subdivision)
New Mexico (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is our intention to drill a well with rotary tools at the above location to a total depth of approximately 10,000', unless commercial production is obtained at a lesser depth. All casing points will be cemented in accordance with approved methods of the U. S. Geological Survey and any other special requirements will be complied with.

It is planned to use the following casing pattern: 13 3/8" casing to be set at approximately 250' and cemented with 250 sacks; cement to be circulated. 9 5/8" casing to be set at approximately 1500' and cemented with approximately 125 sacks or sufficient cement to return to the bottom of the surface pipe. Provided commercial production is indicated, a 7" OD oil string will be set at total depth and cemented with sufficient cement to protect and isolate any possible productive zones encountered while drilling.

Approval to produce this well upon completion is also requested. I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company Continental Oil Company
