DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to set 40' of 10" surface casing, 450' of 8 1/2" casing, and 1320' of 7" OD casing. The 10" and 8 1/2" casing will be mudded and pulled when the 7" production string is cemented with 25 sacks. The well will be drilled to the gas horizon at approximately 1500'. This well is drilled for the purpose of utilizing the gas we have stored in this area.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
