(State or Territory)

The elevation of the derrick floor above sea level is 3786 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On August 18, 1956 we ran, 2741' of 7" OD 20# 3rd thrd used seamless casing to 2745' and cemented with 100 sax Alamo cement. After allowing to stand cemented for 72 hours, we bailed hole dry, drilled plug and re-ran bailer. As shut-off proved complete drilling operations were resumed. Cementing was done by Denton Oil Well Cementing Company.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company General American Oil Company of Texas
