Completion or Recompletion Report and Log form.)17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any
proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

This well was re-entered July 8, 1974, and deepened from 7,000 feet in the Abo to 11,384 feet in the Mississippian. A drill stem test of the Pennsylvanian-Morrow sand at 11,205' to 11,225' recovered only 30' of slightly gas cut mud. Pursuant to oral approval given by Mr. Knauf July 31, 1974, of the U.S.G.S. office in Artesia, we plan to plug and abandon the well as follows:

150 ft. cement plug 10,800 to 10,650 feet
150 ft. cement plug 9,225 to 9,075 feet
150 ft. cement plug 8,000 to 7,850 feet
150 ft. cement plug 6,875 to 6,725 feet
150 ft. cement plug 4,600 to 4,550 feet
150 ft. cement plug 3,650 to 3,500 feet.

A ten foot plug and marker will be placed at surface. Cement plugs will be spotted with 42 viscosity drilling mud.
