Gentlemen:

Your December 16, 1965 Supplement to the Oil Proration Schedule assigns to the following well a December allowable of 15 days at 9 barrels, and 16 days at 40.

Murchison and Closuit State B#1 J 16-17-31, Grayburg-Jackson Pool, Eddy County, New Mexico.

Your January, 1966 Proration Schedule (Order A-194) assigns this well the old allowable of 9 barrels per day. However, we believe this to be in error and that the allowable should be a normal unit allowable of 42 barrels per day, and we would like a reply from you regarding this.

Yours very truly,

MURCHISON AND CLOSUIT
