Wellbore to be temporarily abandoned by setting a CIBP at 1840'($\pm 50'$ above production casing shoe) and capping with Class "C" cement. After allowing cement to set for 24 hours the production casing will be tested to 500 psi. This test shall be witnessed by a BLM representative.

In lieu of permanently plugging this well, it is requested that a twelve(12) month extension be granted so that the well may remain in a temporarily abandoned status following the proposed mechanical integrity test. It is Devons intent to further evaluate the Seven-Rivers interval for any additional explotation potential. Plugging this well could possibly necessitate it being redrilled at a future date.
