Loco Hills, New Mexico August 22, 1962

Well No. 15 is located 1660 ft. from N line and 1480 ft. from E line of sec.

SW 1/4 Section 31 17-S 30-E R.M.P.M.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Loco Hills Eddy New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3585 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On July 9, 1962 we ran 2819' of 7" OD std 23# & 26# used JS casing to 2822' and cemented 1/125 sacks liner w/6% gal and 100 sacks liner w/2% CaCl₂. We pulled 10 3/4" loose and spotted 135 sacks liner w/6% gal & 2% CaCl₂. We pulled all 10 3/4" casing.
After standing 24 hours we pressured upon casing to 3300 psig.
After standing 48 hours we bailed hole down, drilled plug and re-ran bailer. WSO proved complete.
Cementing and pressure testing was done by Denton Oil Well Cementing Company.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
