The elevation of the derrick floor above sea level is **3585** ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

On June 16, 1962 we ran 451' of 10 3/4" OD drd 32.75# used H3 casing to 451' and obtained formation shut-off. Shut-off was verified by bailing hole dry and testing for 1 hour.

Note: This casing was subsequently pulled during cementing operations on 7" OD casing.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company **General American Oil Company of Texas**

Address **P. O. Box 416**
