Well No. 1 is located 330 ft. from N line and 2310 ft. from E line of sec. 6
NW 1/4 NE 1/4 6 17 S. 29 E. NMPM
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Carper Drllg. Co. Elm New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to pump enough mud through tubing to fill bottom of hole from 2440' to 2390'. Tubing will then be knocked off above cement on packer. Mud will be circulated through tubing. Tubing will be pulled to 1400' and a ten sack cement plug run. Tubing will then be pulled to 400' and a ten sack cement plug will be run. Tubing will be pulled out of hole and hole filled to surface with mud and a 4" marker set in a 5-sack plug at the surface.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company Carper Drilling Company
