DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Plan to pull tubing, rods, & rig-down pumping unit & temporarily abandon the 2-4. Pumping unit & rods will be moved to the 1-4 well. The 2-4 is presently producing 400 + 00 to 90 bbls. water per day. We have not definitely made up our mind to plug the 2-4 & also wish to see how the 1-4 produces on the pump.
