Puckett "A"
Well No. 25 is located 25 ft. from ~~XXX~~ [S] line and 2615 ft. from ~~XXX~~ [E] line of sec. 13
SW SE Sec. 13 17S 31E NMPM
($\frac{1}{4}$ Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Maljamar Eddy New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is proposed to drill this well with cable tools to a depth of approximately 4000 feet. We will cement 8-5/8" casing at approximately 575' with 100 sacks. The production string will be either 4½" O.D. or 5½" O.D. cemented at total depth with 150 sacks of 4% Gel cement plus 100 sacks of Neat cement. Completion will be made by perforating casing and treating zones selectively. The well will be produced for a time and later will be converted to a water injection well.

This location is authorized under Commission Order No. _____

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
