NEW MEXICO OIL CONSERVATION COMMISSION
PACKER SETTING REPORT

I, E. R. McPhaul, being of lawful age and having full
Name of party making report
knowledge of the facts hereinbelow set out do state:

That I am employed by WINDFOHR OIL COMPANY in the capacity of
Production Superintendent, that on Feb. 21, 1968

I personally supervised the setting of a Baker - Model N
Make & type of packer

in WINDFOHR OIL COMPANY, Jackson "B",
Operator of well *Lease name*

Well no. 28 located in the Grayburg Jackson and Fren field,
Eddy county, state of New Mexico, at a subsurface depth of
2296' feet, said depth measurement having been furnished me by
John McPhaul by tubing measurement;

That the purpose of setting this packer was to effect a seal in the annular space between two strings of pipe where the packer was set so as to prevent the commingling, in the bore of this well, of fluids produced from a stratum below the packer with fluids produced from a stratum above the packer; that this packer was properly set and that it did, when set, effectively and absolutely seal off the annular space between the two strings of pipe where it was set in such manner as that it prevented any movement of fluids across the packer.

E. R. McPhaul
(Signature)

Production Superintendent
