Marbob Energy requests permission to change the plan for the reserve pit as outlined in the A.P.D. The pit dimensions will be constructed per the APD, but a dike will be built across the pit, dividing it in half. We anticipate only using half of the pit, therefore only the half that we will utilize will be lined with plastic. The other half of the pit will be lined w/plastic and used only if we encounter a waterflow during drlg operations and find that we will need additional room. This portion of the pit is a precautionary measure only. The portion of the pit that we are lining w/plastic should be more than adequate for normal drlg operations. If we do encounter a waterflow, we should have ample time to line the other half of the reserve pit w/plastic before the water encroaches.

14. I hereby certify that the foregoing is true and correct.
