13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

NOTIFICATION OF LOCATION CHANGE.

Originally proposed location: 1320' FSL & 60' FEL, Sec 6-T17S-R31E

New location: 1310' FSL & 60' FEL, Sec 6-T17S-R31E

The above move is required to comply with the New Mexico Oil Conservation Division Rule which requires all well locations be a minimum of 10' from all quarter-quarter section lines. Because this move is only 10' from quarter-quarter section lines, the surface utilized for the Drilling Pad and Reserve Pit will remain unchanged. All excavation work will remain within the confines approved in the original APD.

A drilling rig is currently working in this area. As per telephone conversation with the BLM's Shannon Shaw, this move has been tentatively approved.
