U. S. GEOLOGICAL SURVEY
ARTESIA, NEW MEXICO
(State or Territory)

The elevation of the derrick floor above sea level is 3571 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work.)

Request is hereby made to drill a 2400' Grayburg Formation cable tool test with the following casing program:

- 8-5/8" @ 320' w/set
- 5-1/2" @ 2400' w/100 sx.

If the captioned test is productive, it is planned to pull the 8-5/8" casing and cement the 5-1/2" casing at 320' with 30 sacks (100' @ 220-320') of 50-50 pozmix cement.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
