1. The first part of the report is a general introduction to the subject of the study. It discusses the importance of the study and the objectives of the research.

2. The second part of the report is a detailed description of the methodology used in the study. It includes information about the sample size, the data collection methods, and the statistical analysis techniques.

3. The third part of the report is a discussion of the results of the study. It presents the findings of the research and compares them with the existing literature.

4. The fourth part of the report is a conclusion and a list of recommendations. It summarizes the main findings of the study and provides suggestions for future research.

5. The fifth part of the report is a bibliography of the sources used in the study. It lists the books, articles, and other references that were consulted during the research process.

6. The sixth part of the report is an appendix containing additional information related to the study. This may include raw data, detailed calculations, or other supporting materials.

7. The seventh part of the report is a list of figures and tables. It provides a summary of the visual elements used in the study, such as graphs, charts, and tables.

8. The eighth part of the report is a glossary of terms. It defines the key concepts and terminology used throughout the study to ensure clarity and consistency.

9. The ninth part of the report is a list of abbreviations. It provides a shorthand reference for the various acronyms and abbreviations used in the text.

5/14/64  
approval granted to complete  
as a WTU with injection  
through tubing under a  
packer set at just above the  
Q formation in the 4½" casing string
