(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

As witnessed by Mr. Frost. The plugging program was changed by the instructions of U. S. G. S. representative, Mr. Jack Frost. We ran 50 sax aquajel at 4200', Ran 15 sax cement at 4200'. Ran 20 sax cement at 1350' and 20 sax cement at 400' using tubing and Halliburton method, set regulation marker, cleaned and abandoned location.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
