August 8, 1956

Lane
Well No. 3 is located 330 ft. from N line and 330 ft. from E line of sec. 29
SE 1/4 SE 1/4 19S 30E N. M. P. M.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
undesignated E44 New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3272.3 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We intend drilling this well to an approximate depth of 1800' or a sufficient depth to test the Yates sand. 8-5/8" casing will be run and cemented at approximately 400', with sufficient cement to circulate to surface or cellar. 5-1/2" casing will be run to approximately 1750' and cemented with sufficient cement to circulate back to surface.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
