(NOTE: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

This well was previously approved for temporary abandonment until December 1, 1974.

The well is located in a waterflood project which is in its final stage and approaching economic limit. A tertiary feasibility study is in progress and if such a project is initiated at the termination of the secondary project, this well could be re-activated and used in the tertiary project. Presently, the well is capped with a bridge plug set at 3,375'.

We therefore request approval to temporarily abandon this well until October 1, 1975.
