SUBSEQUENT REPORT OF:

WATER SHUT-OFF	☐	REPAIRING WELL	☐
FRACTURE TREATMENT	☐	ALTERING CASING	☐
SHOOTING OR ACIDIZING	☐	ABANDONMENT*	☐
(Other)	☐		

(NOTE: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

In order to prepare this producing well for expected waterflood response, we propose to perform the following work:

Clean out open hole to existing T.D. of 3520'. Deepen w/6 1/2" bit to 3930', run & cement 4 1/2" OD 8R 9.5# liner from approximately 3100' to 3930'. Run cement bond log and GR-N log. Perform remedial cementing of Yates zone if necessary by shooting four holes at top of cement and circulating 200 sx of cement behind 7" casing. These holes will then be squeeze cemented if necessary. Perforate Upper Queen Zones 1, 2 and 3 and Lower Queen Zones 1, 2 and 3 (limited entry) at points selected from GR-N log and treat w/50,000 gal slick water & 50,000# 20/40 sand. Perforate Yates w/one 3/8" JS @ 2738, 2743, 2756, 2765, 2770, 2775, 2798 and 2804. Treat w/30,000 gal slick water & 30,000# 20/40 sand. Run 2-3/8" tbg to approximately 3900'. Place well on rod pump.

Work will commence about July 9, 1969.

18. I hereby certify that the foregoing is true and correct

Instructions

General: This form is designed for submitting proposals to perform certain well operations, and reports of such operations when completed, as indicated, on Federal and Indian lands pursuant to applicable Federal law and regulations, and, if approved or accepted by any State, on all lands in such State, pursuant to applicable State law and regulations. Any necessary special instructions concerning the use of this form and the number of copies to be submitted, particularly with regard to local, area, or regional procedures and practices, either are shown below or will be issued by, or may be obtained from, the local Federal and/or State office.

Item 4: If there are no applicable State requirements, locations on Federal or Indian land should be described in accordance with Federal requirements. Consult local State or Federal office for specific instructions.

Item 17: Proposals to abandon a well and subsequent reports of abandonment should include such special information as is required by local Federal and/or State offices. In addition, such proposals and reports should include reasons for the abandonment; data on any former or present productive zones, or other zones with present significant fluid contents not sealed off by cement or otherwise; depths (top and bottom) and method of placement of cement plugs; mud or other material placed below, between and above plugs; amount, size, method of parting of any casing, liner or tubing pulled and the depth to top of any left in the hole; method of closing top of well; and date well site conditioned for final inspection looking to approval of the abandonment.
