(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding and cementing points, and all other important proposed work)

We propose to drill this well with rotary tools to a total depth of 2800' unless commercial production is found at a lesser depth.

We propose to set 8 5/8", once ran casing, to 240' with cement circulated to surface.

If production is found, we propose to run 4 1/2" casing and cement with 200 sacks cement.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
