Re: Multi-Point Back Pressure
Test, Kewanee State No. 1,
Unit D, 2-20-23.

Gentlemen:

The subject reports is being returned for one correction. Please note that (Q2) on the graph appears to be 1190 MCFPD rather than 1019 MCFPD as shown. This will change the slope (n) to .73313 from .66575; see calculations as follows:

Q2 = 1190, Log = 3.07555
Q1 = 220, Log = 2.34242
Slope n = .73313

If you have any questions concerning this matter, do not hesitate to call upon me.

Very truly yours,

R. L. Stamets

RLS/uh
