| <i>1000 pounds of cement was used to cement the casing to the bottom of the well. The casing was cemented to the bottom of the well and the cement was allowed to set for 24 hours. The casing was then tested and the pressure was held for 24 hours. The casing was then removed and the well was plugged.</i> |                                   |                             |                       |                    |                       |
