

GAS-OIL RATIO TESTS

[illegible]

... ..

During small ratio tests, each well shall be produced at a rate not exceeding the top unit allowable for the pool in which well is located. Operator is encouraged to take advantage of this 25 percent tolerance in order that well can be assigned increased allowable when authorized by the Division.

Gas volumes must be reported in MCP measured at a pressure base of 15.025 psia and a temperature of 60° F. Specific gravity base 0.613.

Supreme Court Justices for any and all products through cases.

Had original and one copy of this report to the district office of the New Mexico Oil Conservation Division in accordance with the law and applicable pool rules.

I hereby certify that the above info
is true and complete to the best of my
