Re: #1 Buchanan Gas Com SE NW  
Sec. 7-20S-25E

Gentlemen:

We are in receipt of Commission Form C-103 on the subject well reporting setting the 8 5/8" casing. However the amount and type of cement reported is not in agreement with information furnished the Commission representative that witnessed the cementing.

Please clarify this matter.

Very truly yours,

OIL CONSERVATION COMMISSION

W. A. Gressett  
Oil & Gas Inspector

WAG/bh

## THEORY OF THE EARTH

1. The Earth is a sphere of about 8000 miles in diameter. It is composed of a solid inner core, a liquid outer core, and a solid mantle. The crust is the thin outer layer of the Earth.

2. The Earth's surface is covered by water and land. The water is composed of oceans, seas, and lakes. The land is composed of continents and islands.

3. The Earth's atmosphere is composed of gases and is about 100 miles thick. It is divided into layers: the troposphere, stratosphere, mesosphere, and thermosphere.

4. The Earth's interior is composed of the core and mantle. The core is divided into the inner core and outer core. The mantle is divided into the upper mantle and lower mantle. The crust is the thin outer layer of the Earth.
