Re: ✓ CC Tank Unit #4 - J-8-20s-24e  
Multi-Point Back Pressure Test

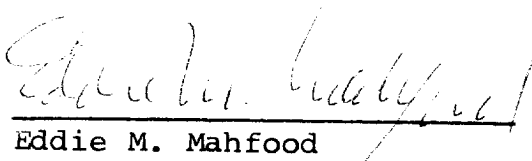

Dear Bill:

A pipeline connection was made with Transwestern on August 2, 1977 but the sales contract had already expired. At completion, we have been getting only a one-point flow rate, taking the 4-point after the well is put on line.

As per our telephone conversation this morning, we will submit the multipoint back pressure test after the well is put on the line.

Very truly yours,

YATES PETROLEUM CORPORATION

  
Eddie M. Mahfood
