RE: State of New Mexico Oil and Gas Lease
No. K-6260 (NM-3976)

Attention: Mr. Phil R. Lucero
Commissioner

Dear Mr. Lucero:

In reference to the PV State #1 well on captioned lease, the pump jack was down for several days with the rods thrown out of the motor. When the jack went down, we were making a very small amount of water colored with oil. When we started back pumping, the well was showing a greater cut of oil; however, it is still a small cut of oil. We intend to test for a few more days and possibly treat a new zone or retreat an old one.

If you should have any questions concerning this well, please let me know and I will furnish same to you.

Very truly yours,

Ralph Nix
