17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

The North Hackberry Yates #117 was recently completed and is pumping with a gas engine into a 210 bbl tank on location. The production from the tank is then trucked to the tank battery.

It is requested that the Surface Development Plan approved on January 22, 1983 be amended to allow this well to be connected with flowline to the tank battery on this unit. The flowline will be run along the right-of-way of the existing road and the access road approved in the previously mentioned Surface Development Plan (see attached plat). The access road was given archeological clearance on December 6, 1982 by ACA F83-258. The flowline will be approximately 4200' long and constructed of steel pipe.

Gentlemen:

Attached is a Federal Sundry Notice Form with a modification to our Application for Permit to Drill for the North Hackberry Yates #117 item 4, "Tank Batteries, Production Facilities, and Lease Pipelines". Per Tom Mueller's conversation of 3-23-83 with Mr. Don Peterson, BLM, Carlsbad, and Mr. George Stewart, MMS, Roswell, we are proceeding with installation of the flowline.

Yours very truly,

R. C. ANDERSON
