DETAILED ACCOUNT OF WORK DONE AND RESULTS OBTAINED

We drilled the above well with rotary tools to a total depth of 368. We previously had cemented to the surface 30' of 7" O.D. pipe. We plugged the well in the following manner. Spotted a plug of 5 sax of cement in bottom of hole. Top of cement plug came to 345. We then filled hole with heavy mud to 45 feet and set a bridge at that depth. We then filled the hole to the surface with cement, placed a 4' Pipe marker in place on surface, cleaned up the location and moved off.
