Page & Yates Well No. 7, located in Unit J of Section 6, injection to be accomplished through tubing installed in a packer set at approximately 680 feet, with injection into the open-hole interval from approximately 685 feet to 775 feet;

R- 3842 - 9-17-69

PROVIDED HOWEVER, that in said Wells Nos. 8 and 6, the casing-tubing annulus shall be filled with an inert fluid; that in said Well No. (7) the annulus shall be filled with mud; and that a pressure gauge shall be attached to the annulus in each of the wells in order to determine leakage in the tubing, casing, or packer.
