(County or Subdivision)

New Mexico
(State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This Well will be drilled to the Yates Sand which is about 600 ft. I intend to cement 8 $\frac{1}{2}$ " pipe from the surface to the top of the lime formation which is approximately 250', unless water, or other formations are encountered that would need casing

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
