DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill a test to the Yates Sand section, expected at 450'. 7" casing will be set in top of formation, and sands will be tested in a dry hole. 8-5/8" surface pipe will be set if necessary to shut off water in the Rustler line.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
