The elevation of the derrick floor above sea level is Not Surf.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Proposed Program: Drill with Cable Tools. Will drill to approximately 600'. Will drill 11" hole to 300' and run 8 5/8" casing, 24# new, and make a formation shut-off. Will drill 7 7/8" hole to total depth unless water is encountered at which time 7" casing will be run to shut off water. The production string will be 5 1/2" new 17# Casing cemented from top to bottom with 300 sacks if well is a producer. Estimated water show at 90' - 100' and 125' - 135' Oil show at approximately 550' - 600'. Drilling Operations will begin immediately upon approval.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
