Well No. 6 is located 290 ft. from ~~North~~ S line and 330 ft. from ~~West~~ E line of sec. 6
SE/SE Sec. 6 20 27 N.M.P.M.
(¼ Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Mc Millan Eddy New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We intend to drill a well approximately 850 feet to test the Queen producing formation. Size of hole 8 5/8 to 450 feet to set 7 inch O.D. pipe on a packer to shut-off water and to produce well if oil is encountered. After such time as well is produced long enough to determine if such well is going to hold up 7 inch will be cemented or pulled and 5½ inch run and cemented with fifty sacks.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
