DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

Propose to drill with rotary tools to a total depth of approximately 900 feet to test the Yates formation.

The casing program will be according to the rules and regulations of the USGS and all surface waters will be protected. The USGS will be notified prior to the setting or cementing of any and each string of casing. If production is obtained the pay string of casing will be set and cemented through the pay zone with adequate amount of cement.

The Pioneer Drilling Company of Moab, Utah is the drilling contractor.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
