Re: Getty Oil Co.(Tidewater),
George Dooley well No. 11-D &
10-M, 24-T20S-R29E, Getty Pool,
Eddy County, New Mexico

Dear Ralph,

We received the enclosed letter July 15, 1960 and have corrected the allowable of the two wells as of July 1, 1960.

This letter should help clarify your records on these wells.

Very truly yours,

R. L. Stamets
Geologist

RLS/hb

New Mexico Oil Conservation Commission
Proration Office
207 Carper Building
Artesia, New Mexico

Attention: W. A. Gressett

Dear Sir:

In January, 1959, the proration schedule changed the allowable (33 BPD) on the Getty Oil Company's George Dooley "A" Well No. 11 to Well No. 10, apparently in error. Well No. 10 was NIO and carried no allowable. This has caused No. 11 to be overproduced while the lease remained underproduced.

In April, 1960, Well No. 10 was acidized and put back on production. Form C-104 was filed requesting an allowable of 21 bbls. for No. 10.

Since the proration schedule already carried No. 10 with an allowable of 33 bbls., this was cut to 21 bbls.

We regret that we have been negligent in reporting this error, and would appreciate your restoring allowable of 33 bbls. to No. 11 and 21 bbls. to Well No. 10.

Very truly yours,

TIDEWATER OIL COMPANY
