($\frac{1}{4}$ Sec. and Sec. No.)

(Twp.)

(Range)

(Meridian)

Wildcat

Sady

New Mexico.

(Field)

(County or Subdivision)

(State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Ran 620 feet of 8" casing, and mudded with fifty sacks of mud, to shut off water encountered below 10" casing. After standing 24 hours for mud to set, test for water shut off, by beiling, on July 3, 1944 showing complete water shut-off.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
