Re: A-25 Indian Federal #1
Gas Well Test
Eddy County, New Mexico

Mr. R. L. Stamets, Geologist
Oil Conservation Commission
P. O. Box DD
Artesia, New Mexico

Dear Mr. Stamets:

Referring to your letter of May 10, and our conversation at your office, we enclose a Southeast New Mexico Packer Leakage Test on the Cisco and Morrow zones of the reference well. Also attached is Form C-122 Multi-Point Back Pressure Test with chart, on the morrow zone.

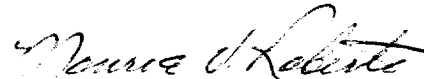

On the Upper Penn zone we were unable to get a Four-Point Pressure test because the pressure will not stabilize. Upper Penn production is as follows:

February, 1966	546 MCF
March, 1966	0 MCF
April, 1966	587 MCF

We believe this is the information you requested. If there are any questions we could help you will, please write.

Very truly yours,

PENROC OIL CORPORATION

Monroe V. Roberts
Production Superintendent
