13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

On 11/18/98 I sent form 3160-5 requesting approval for off lease measurement, storage & sales, alternate measurement method, and commingling of the gas and liquid hydrocarbons from the lease shown above. There was an error in the manner of measuring liquid hydrocarbons. The production from this well goes into a 2-phase separator. The gas is metered and sent to the Indian Basin Gas Plant via pipeline as previously shown. The liquids, both water and liquid hydrocarbons, are sent to a storage tank on location where they are gauged and "color cut" and the strapping chart for the tank is used to calculate the daily production. The liquids are then truck hauled to the Indian Basin Gas Plant for further separation. The liquid hydrocarbons, after further processing, are sold through a LACT meter. After separation, the water is pumped into various water disposal wells per prior approvals. A corrected drawing of the facility is attached.
