

DEVELOPMENT PLAN FOR SURFACE USE

- I    Existing Roads  
     See enclosed plat. This is a re-entry of a well originally drilled and plugged in 1968.
- II   Planned access roads  
     None
- III   Location of existing wells  
     See enclosed plat.
- IV   Lateral roads to well locations  
     None as yet.
- V    Location of tank battery and flow lines  
     See enclosed completion plat.
- VI   Location of drilling water source  
     All water will be trucked in.
- VII   Methods of Waste disposal  
     This will be by burial at location - this is thought to be minimal (we will drill only 3000').
- VIII   Location of camps  
     None
- IX   Location of airstrips  
     None
- X    Location Layout  
     See enclosed drill site
- XI   Plans for restoration of surface  
     Any surface alteration will be returned to its present condition.
- XII   Inviromental Impact  
     Any permanent installations shall be made to blend into and be as inconspicuous and as compatable with the inviroment as possible and is usual.
