

A BOP Sketch is attached.

6. CIRCULATING MEDIUM:

Surface to 500 feet: Fresh water with lime or gel as needed for viscosity control.

500 feet to Total Depth: Brine water with additives as necessary for control of viscosity, pH, weight and water-loss.

7. AUXILIARY EQUIPMENT:

Drill string safety valves will be maintained on the rig floor in the open position while drilling operations are in progress.

8. TESTING, LOGGING AND CORING PROGRAMS:

Drill stem test will be made when samples, drilling time and other data are sufficient to indicate a test is warranted.

It is planned that electric logs will include GR-CNL-FDC logs and dual Laterologs.

No coring is planned.

9. ABNORMAL PRESSURES, TEMPERATURES, OR HYDROGEN SULFIDE GAS:

None anticipated.

10. ANTICIPATED STARTING DATE:

It is planned that work will commence on or about August 1, 1981, with drilling and completion operations lasting about 30 days.
