In RE: Uriah Exploration, Inc.  
Stein-Federal No. 1  
Sec. 30-22-25

Glenn Cope  
Federal 30 Com #1  
Section 3-22-25

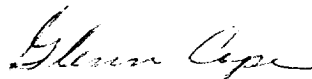

Dear Mr. Williams:

As we discussed today, El Paso instructed us to shut the two subject wells in and since we opened them back up, they both have experienced reduced deliverability. Especially the Stein-Federal No.1, as it will only produce about half as much now as it would before we shut it in.

We respectfully request that the Stein-Federal No. 1 be excepted from the annual gas well shut-in pressure test if possible.

On the Federal 30-1 Com. No 1 we missed an opportunity to run the multi-point back pressure test while the well was S.I. If it is possible, we would request of you that we not re required to run the multi-point back pressure test on this well because it would have to be S.I.

Very truly yours,

Glenn Cope
