

Continuance of Form C-122

Remarks: This filing is for reclassification from oil to gas well. Evidence over the past six months and the recent GOR tests indicate the well has a GOR over 100,000. When the 4-point test was run, the well produced an anomalous slug of oil which made the GOR below 100,000. TXO believes this to be an anomalous condition and requests that this well be reclassified to a gas well.
